Computers should have a fast processor, at least 1GB of ram and a 7200 rpm hard drive. CD burning is essential. LCD screens save space and energy, don't cause interference when near electric guitars and give more viewing space. They are also easier on the eye.

O t h e r K i t

The music keyboard connects to a USB port on the computer. Similarly, the audio interface connects to a firewire port on the computer. Always check for latest drivers.
